Core Capability Areas

- Federal product sourcing and procurement support
- Government technology procurement and quote coordination
- Microsoft 365, cloud, and licensing solution support
- IT procurement across hardware, networking, security, and specialty equipment

- Partner-enabled cybersecurity delivery and solution coordination
- Capture intelligence, RFQ war room support, and executive briefing workflows

Operational Strengths

- Built for procurement discipline, operational readiness, and execution
- Supporting commercial and government customers with direct coordination
- Technology solutions through trusted provider relationships
- Partner-enabled cybersecurity delivery without overstating internal capabilities
- Capture and pursuit support organized around timing, compliance, and decision quality

Engagement Focus

FTS is intentionally positioned to support multiple solution lanes without becoming vague or overstated. The company focuses on what it can truthfully coordinate and execute now: sourcing, technology support, provider-backed cybersecurity packaging, and intelligence-driven pursuit support.
